**Objective: Letter of Recommendation for Wet Wipes**

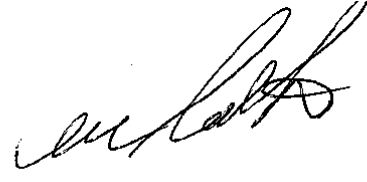

The upkeep and maintenance of your Life Fitness Gym Equipment is critical to ensuring your facility can operate consistently and smoothly, allowing the best customer experience possible. Daily cleans of your gym equipment is vital as well as providing the correct cleaning solution for your customers.

Life Fitness recommends using Offshoot (NZ) Ltd as they have a wide range of wet wipes and dispensing options to not only clean and sanitise your equipment, but do so in a safe capacity. Their wipes are certified 100% biodegradable, 100% compostable and FSC approved. Not only are they safe on the environment but on your Life Fitness Equipment as well. Their wipe is impregnated with a disinfectant that is safe to use on the equipment, however still 99.9% effective against Bacteria & Viruses. The wipe is wet enough to clean the equipment, but not dripping wet to cause damages.

We recommend that you get in touch with one of their team members to discuss the options available for your facility and your equipment.

Regards
